

2023 Prior Authorization List

A Prior Authorization is a feature of a prescription benefit plan that helps ensure the appropriate use of selected medications. Elixir Pharmacy & Therapeutics (P&T) Committee reviews and approves utilization management criteria for new and existing drugs. Included in the review of Prior Authorization criteria are new clinical data, safety information, evidence-based clinical guidelines and practice trends. The list is not all-inclusive and does not guarantee coverage. For specific questions about your coverage, please visit elixirsolutions.com. *Effective on 5/1/2023.*

DAUNORUBICIN
DAURISMO
DEFERIPRONE

*Drug included in PrecisionPA program. PrecisionPA is a tailored approach to manage select medications where dosing is variable based on drug, diagnosis, regimen, and/or weight-based calculations. As part of Elixir's improved utilization management approach, the use of specific prior authorization parameters help ensure correct application of the dosing of a medication for a specific member.
