Observations

- A higher percentage of April inmates were pretrial and a lower percentage were sentenced
- The number in jail for the most serious offenses stayed about the same from February to April
- The number in jail for the least serious offenses declined (e.g., misd theft and misd traffic)
- There were fewer in jail for DUIs
- The number in jail for assault, battery, and domestic battery declined
- The number in jail for drug distribution and felony drug possession declined
- There were fewer in jail for robbery, burglary, and theft in April

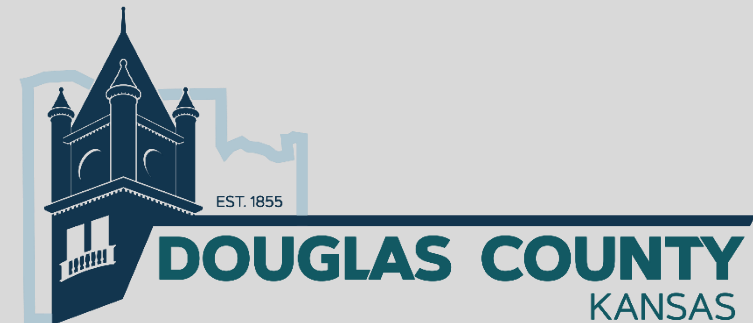

Qualitative Information from Patrol Officers

- Warrants are not being actively served
- When contact occurs, if the person has a warrant, law enforcement officers are encouraging resolving by contacting the court.
 - Exception: level of severity of the charge is threat to public safety
- During stay-at-home orders the streets were empty

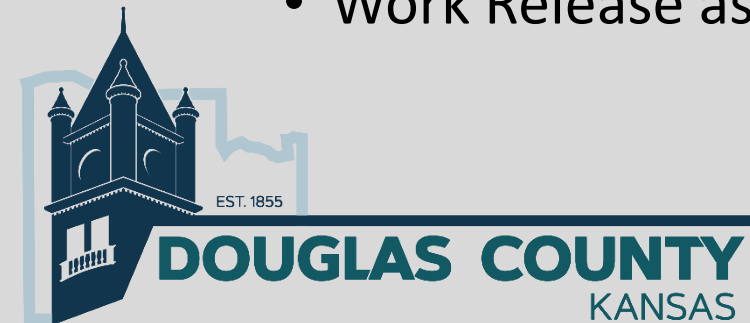

Impact on Jail Classification

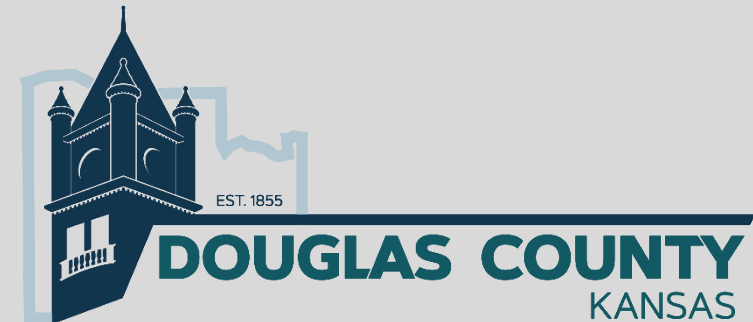

Functional Capacity

- Prior to COVID, functional capacity was 164
- All bookings have a 72 hour observation period
- The jail needed a pre-classification pod for men
 - Women's Pod is now male pre-class (loss of 14 beds)
 - Women housed in Male Minimum (April)
 - Women were housed in Jefferson County or booking/medical (early May)
 - Women had to be returned to Douglas and are now in Male Minimum (June)
 - Male Minimum housed in Work Release
 - Work Release as a program is closed

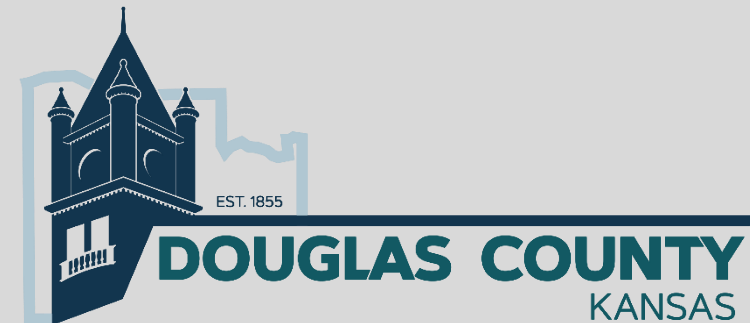

Functional Capacity

Current Functional Capacity is 150-155

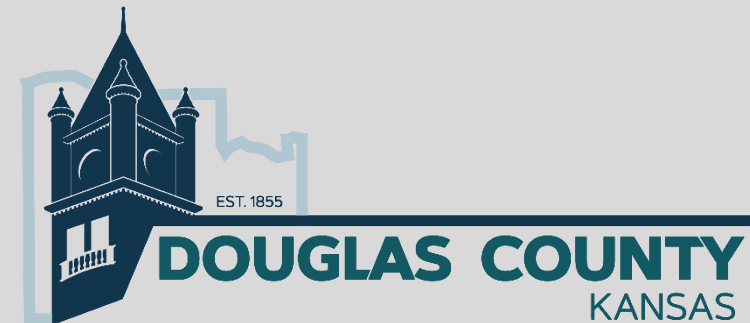

Housing Person Out-of-County

- Currently, jails are accepting very few persons on out-of-county contracts
 - Jefferson County returned all females on 6/5/20, accepted 6 males
 - Anderson (1) & Jackson (2) have persons who has been there prior to COVID
- No jails will commit to housing our persons in the future
- The Sheriff's Office has lost this resource to manage the jail population

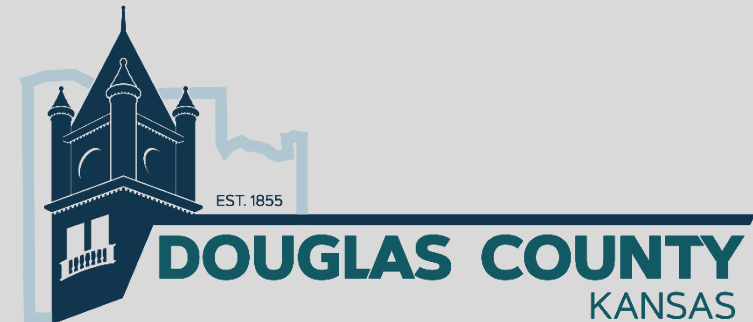

If the jail exceeds functional capacity...

- End 72 hour observation
- Convert main programs room into a housing pod
- Resume housing persons on the floor in pod day rooms

Projecting Jail Population for 6 months

Why did the population decrease during COVID?

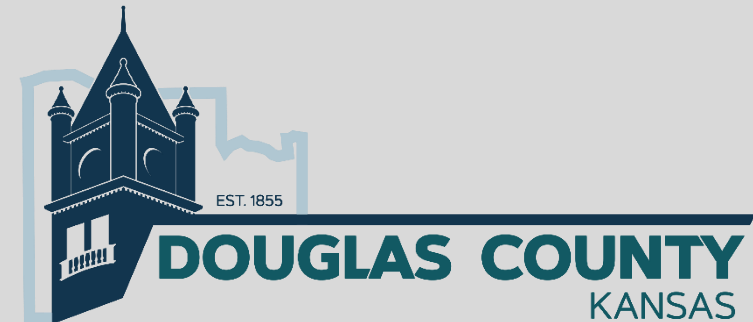

- Decrease in:
 - 911 Calls
 - Police Contacts
 - Warrants Served
 - Jail Bookings
- Release rate did not change significantly
 - 18 released, 1 furloughed due to COVID

More water out than water in, the level drops

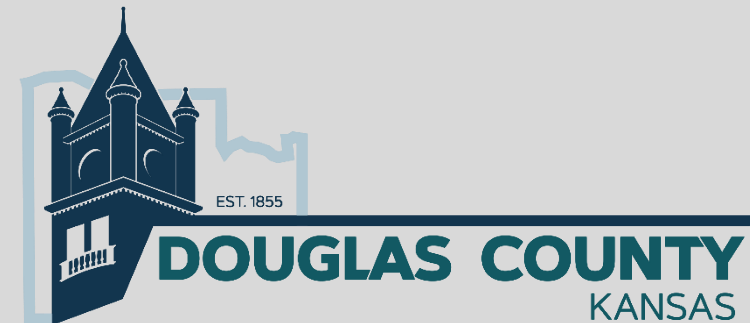

Is this Sustainable?

- Stay-at-Home Order is ending
- Courts are reopening
- Unemployment is at a record high

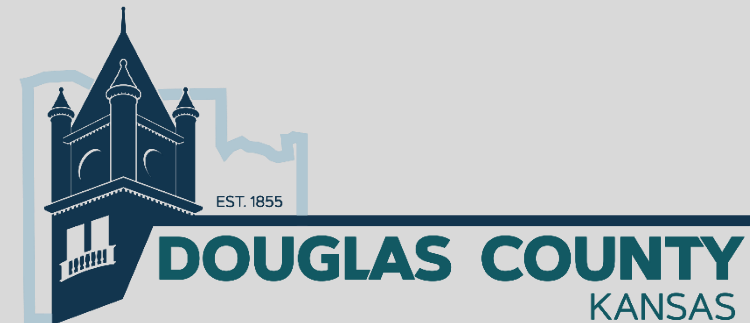

Predicting the Population

- **Population Spike** - due to the number of people waiting to be charged and serve sentence, the jail will soon return to pre-COVID levels.
- Assuming booking rates resume and there is a spike of 40 persons in the jail in 6 weeks, the jail will return to February ADP of 194 by August.
- Based on 5 year data trends, here is the remainder of the year...

Persons waiting to be sent sentenced, charged or revoked

- City of Lawrence Municipal Court = 10 persons (48 days total)
- District Attorney's Office = 50 persons
 - All will receive a summons to court
 - Failure To Appear's will receive warrants and be booked
- Intensive Supervision Probation = 11 Persons
